

# Gem Diamond Products

## *Electroplated Diamond Routers*

To trim, groove or impart form to the edges of marble slabs, alumina, space age composites, graphite and glass, diamond electroplated routers are widely used. Available in shapes such as Ogee, Bull-Nose, Demi-Bullnose etc, these are available in a wide range of forms (see figure) in a variety of standard fittings for compatibility with most machines, in a range of profiles, to fulfill the fancy of all designers.
